## Dashboard Overview

The landing tab of `Financial_Health_Dashboard.xlsx`: six KPI cards summarize the most recent fiscal year, with all four five-year trend charts — Liquidity, Profitability, Leverage, and Efficiency — laid out below them. Every value shown is a live formula, not a typed number.

### Meridian Retail Group — Financial Health Dashboard

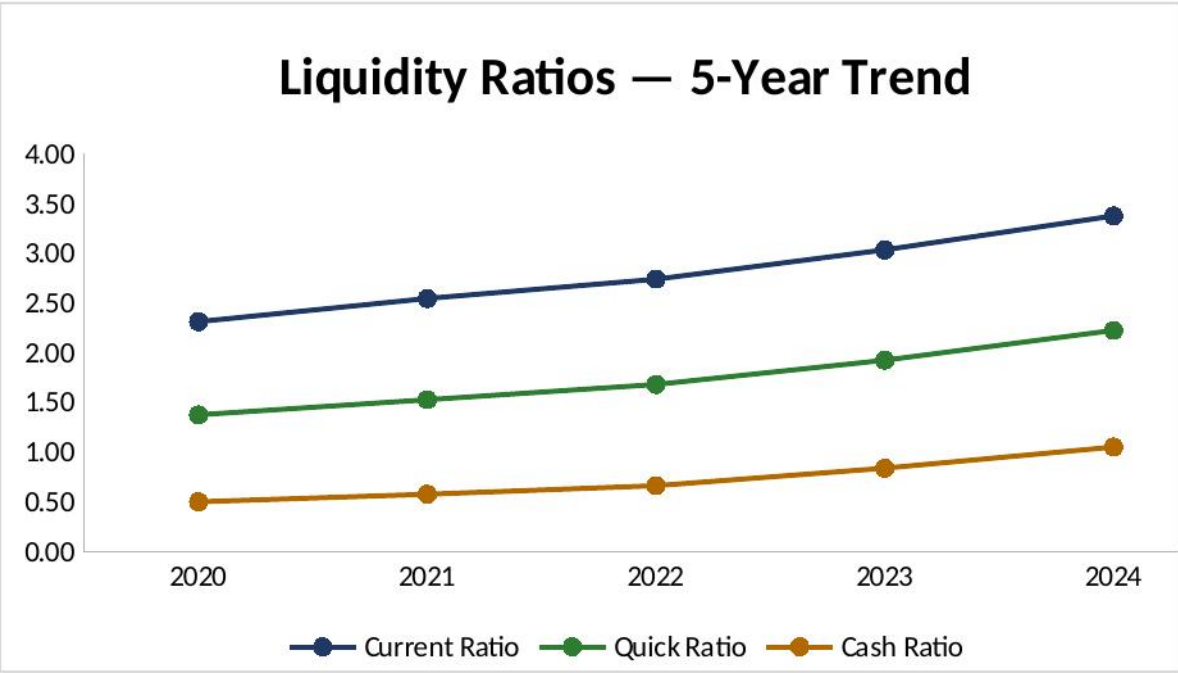

Liquidity, profitability, leverage & efficiency at a glance — FY2020 to FY2024

| LIQUIDITY       | PROFITABILITY     | PROFITABILITY          | LEVERAGE        | LEVERAGE          | EFFICIENCY      |
|-----------------|-------------------|------------------------|-----------------|-------------------|-----------------|
| Current Ratio   | Net Profit Margin | Return on Equity (ROE) | Debt-to-Equity  | Interest Coverage | Asset Turnover  |
| 3.38x           | 15.1%             | 34.5%                  | 0.42x           | 18.90x            | 1.61x           |
| Strong · FY2024 | Strong · FY2024   | Strong · FY2024        | Strong · FY2024 | Strong · FY2024   | Strong · FY2024 |

## Liquidity Ratios — 5-Year Trend

Current Ratio, Quick Ratio, and Cash Ratio plotted from FY2020 to FY2024. All three measures trend upward, and the FY2024 values rate “Strong” against the benchmark table on every liquidity metric.

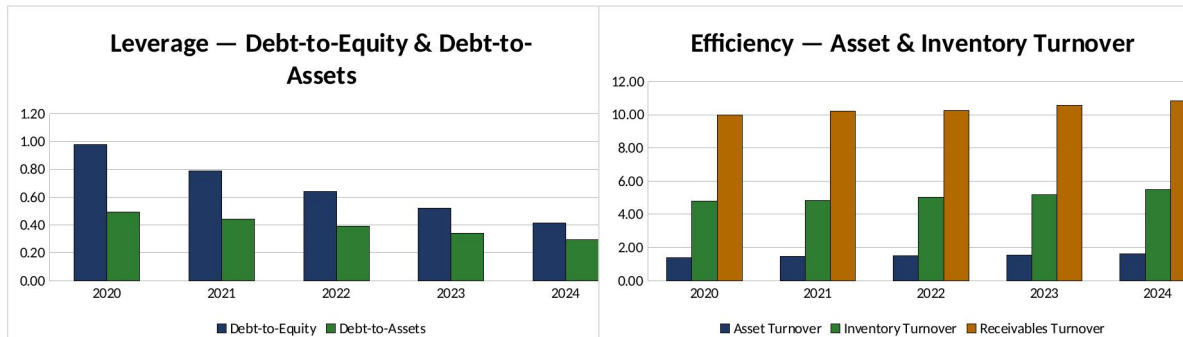

### Profitability Margins — 5-Year Trend

Gross Margin, Operating Margin, and Net Profit Margin over the same five-year window. The widening gap between gross and operating margin reflects operating expenses growing slower than revenue.

## Leverage & Efficiency — 5-Year Trend

The remaining two dashboard charts: Debt-to-Equity and Debt-to-Assets (left) trending down as the balance sheet de-levers, and Asset, Inventory, and Receivables Turnover (right) trending up as working-capital efficiency improves.

See [Ratio\\_Definitions.pdf](#) for what each ratio measures and [Formula\\_Explanation.pdf](#) for how the underlying VLOOKUP, INDEX-MATCH, and nested IF formulas are constructed.
